

THE AERO SKI MFG. CO. INC.
"ALL METAL WHEEL REPLACEMENT SKI LINE"

*Here is an all metal aircraft ski designed and built by pilots with aviation background almost as long as the history of American flying.

*The ski has bottom curvature running along both its length and across its width. This precision engineered running surface produces the smoothest performance ever achieved on snow. We mean all types of snow, ranging from soft, fluffy powder through hard crusted surface; heavy, melting, granular snow and plain ice.

*The ski's superstructure is a masterwork of clean flowing lines and extraordinary strength. Its mounting facility is ultra simple, yet totally blended into the rugged beauty of the overall ski.

*Skis are fitted with a stub axle sleeve for wheels to ease hanger handling. The Aero Skis are intended for either the right or the left gear in order to compensate for bottomwear.

*Plastic bottoms are available to minimise drag on snow and increase ski bottom life.

MODEL	WIDTH	LENGTH	WEIGHT	ACFT. GROSS
MI500	8 inches	65 inches	16 Lbs.	To 2000 Lbs.
M1800	10 inches	66 inches	18 Lbs.	To 2000 Lbs.
M2000	12 inches	67 inches	20 Lbs.	To 2800 Lbs.
M3000H	16 inches	72 inches	29 Lbs.	To 3000 Lbs.
