

**THE AERO SKI MFG. CO. INC.**  
**"ALL METAL WHEEL REPLACEMENT SKI LINE**  
**FOR HOMEBUILT AIRCRAFT"**

**Model H1250 shown on Hilary Dreier's Kitfox.**

\*Here is an all metal ski made by a company who's sole business is aircraft skis.

\*Homebuilt owners treasure their aircraft just as certified aircraft owners do, so why risk the aircraft on questionable products or accept poor ski performance? Your homebuilt deserves skis that look and perform just like traditional skis.

\*These skis are made to the exact same standards & test requirements as the Aero Ski Certified line.

\*Dolly holes are designed in to move the aircraft from the hanger, etc.

\*Plastic bottoms are an available option.

\*Rigging Hardware Package available to install skis on most aircraft.

MODEL	WIDTH	LENGTH	WEIGHT	ACFT. GROSS
H1250	8", 10", 12"	65", 66", 67"	12-14 Lbs.	1250 Lbs.
