

THE AERO SKI MODEL R2800 "FULLY RETRACTABLE SKI"

So you think your PA-18 "Super Club" is the greatest ski plane ever!! Well, now you can finally get a Pr. of retractable skis to fully realize the potential of this great airplane. With the R2800 "Retractable" we've licked the weight, complexity and the cost problems of the older type moveable skis.

SPECIFICATIONS

MODEL	R2800
WIDTH	18"
LENGTH	71"
WEIGHT	42 Lbs. Ea.
AIRCRAFT GROSS LTD.	To 2800 Lbs.
INSTALLED WT.	104 Lbs.

Unlike wheel penetration skis which do half the job the R2800 locks down when needed for take-off in the "really tough conditions".

- Snow landings can be done with skis up or down.
- Landing on a hard surface is done with simple, efficient cable releases to raise skis in flight.
- All mechanical action - - no hydraulic system to install or maintain.
- Lighter than other retractables.
- Plastic bottoms reduce drag & minimize freeze down.
- Skis maintain proper flight level attitude in either position.
- Can be installed in less time than other retractable systems.

"SKI UP"

"SKI-DOWN"
